

Recurring entries

Short description:

Enter regular recurrent postings in EuroFib for Windows once and create a stack with your postings if needed.

Features:

- Regular recurrent postings per button click (e.g. monthly voucher of your payroll accounting)
- Uncomplicated entries (reduced plausibility checks)
- Dynamic entry of voucher date/posting date/voucher number/posting text
- Contra posting, split posting, cost split
- Complete stack-functionality (stack management etc.)

Dauerbuchungen
