

EuroFib News Service

Description:

The new webservice makes it possible to display our „EuroFib News“ in EuroFib for Windows directly. After the login you can see the newest available changes of the current update within the main window. It's also possible to search specifically with version number from/to.

Features:

- Displays the newest available changes of the current update within the main window.
- Specific search of news with version number from/to
- Individual settings for each user (display within the main window, number of entries, ...)
