# Reminder via Crystal Reports (from V6.4.903)

Remind => Reminder => Options
Tabpage „Options"

Change the printout version to „Crystal Reports".

Please notice, that you can change the options only if there is no active reminder selection.

Remind => Reminder => Options
Tabpage „Crystal Reports"

Here you have to put in the corresponding report for each language you use.
You can put in the path to the report manually or via File => Open (CTRL+O).

You can find the **default reports** under the following path:
(please consider your path and you directory structure!)

**Example german:**
C:\Program Files\PwEuro\Programm\CRReports\Eurofib\Mahnwesen\Mahnung_DE.rpt

**Example englisch:**
C:\Program Files\PwEuro\Programm\CRReports\Eurofib\Mahnwesen\Mahnung_EN.rpt

If you need an individual layout please contact our support.

Remind => Reminder => Texts

After the change to Crystal Reports you have to enter the reminder texts.
Now choose the desired type of text (e.g. reminder level 1) and the corresponding language (e.g. Englisch)

Now click the button „Edit".

In the following window you can enter the text incl. different formatting settings.
You can close your input with the button „OK".

Save your input with a click on the disk within the menu.
Repeat this procedure for each reminder text.

The dynamic embedding of headlines and logos isn´t possible with Crystal Reports because they are fixed within the report.
